Helm Armchair

Helm is an adaptable seating solution with a refined, subtle presence—brimming with architectural references from Zurich’s iconic Helmhaus. The deep and low timber frame compliments lounge environments where its rear structure ensures to work against a wall or in the center of any room.

The armchair’s deep timber frame—with its repetitive spindled backside, solid side panels, and armrests—provides an elegant structure for the interplay of matte and gloss yarns from harmonious textiles. A lumbar cushion is offered for additional support. Gliders are inset on each solid leg for protection.
