Limmat Coffee Table

Tiered cross braces of the Limmat occasional tables reflect an architectural series of viaducts—connecting Zurich’s city center over the namesake river. The circular tabletop, with its tapering edge, rests upon a base that embraces distinct views at every angle.

Intersecting geometric shapes come together, highlighting the architectural roots of the Limmat Coffee Table. Its low and airy profile lends itself to a wide range of interiors. Use one on its own, or arrange in pairs with a matching side table. Gliders are inset on each solid leg for protection.
